PROJECTS

NGO Connect	<i>React, TypeScript, Vite, Tailwind CSS, Node.js, Express.js, MongoDB, JWT</i>	GitHub
- Developed a platform connecting registered users reporting local issues with relevant NGOs based on issue category and location. - Implemented issue reporting with image and location support, NGO registration, category-based matching, and dedicated management workflows. - Worked across the full stack as part of a 4-member team, contributing primarily to backend development, REST APIs, authentication, and database integration.		
DevTrack	<i>React, TypeScript, Vite, Tailwind CSS, React Router, TanStack Query, Node.js, Express.js</i>	GitHub
- Developed a project management platform for organizing projects, tasks, priorities, and progress through a responsive web interface. - Implemented project and task management workflows with reusable React components and structured TypeScript-based application architecture. - Integrated API communication and server-state management using TanStack Query, with routing and responsive UI built using React Router and Tailwind CSS.
